

The Center for Health Innovation

Working with communities to advance health and social justice through innovative and effective policies and programs.

ACA Relationship

- ACA predominantly an Expanded Coverage Statute
- Clinical / Financial Access Focus
- 70-80% of Population Health unrelated to Access to Health Care
- Market-based Solutions vs. Community Planning and Development Focused
 - Profit margins vs. Health Equity
- Social Systems largely ignored in ACA
- Infrastructure Provisions Underappreciated - Examples
 - Workforce
 - National Health Service Corps
 - Teaching Health Center - Residency Development and Funding
 - Community Health Workers
 - Primary Care Expansions
 - CHC Growth

Nationally Certified as New Mexico's Public Health Institute

Nonprofit entity, typically independent from state government and educational institutions.

Population health improvement is delivered through innovative partnerships.

Community and population strengths and assets are identified and leveraged.

Current and emerging health issues are addressed through research, policy, system transformation, communications.

What makes
CHI a PHI?

>20 FTE
Staff
